

# Contents

<b>1 The Body Fluids</b> .....	1
Introduction.....	1
Body Water .....	2
Body Fluid Osmolality.....	2
Units of Osmotic Measurement .....	2
Isotonicity and Isosmoticity .....	5
Normal Body Fluid Osmolality .....	6
Distribution of Ions Across Biological Membranes.....	6
Fluid Exchanges Between Body Compartments.....	8
Exchanges Between Interstitial Fluid and Intracellular Fluid.....	8
Exchanges Between the Plasma and Interstitial Fluid .....	8
Lymphatic System.....	10
Fluid Exchanges Between the Body and the External Environment.....	10
Water Intake .....	11
Water Output .....	11
Ionic Composition of the Body Fluids.....	12
Extracellular Fluid .....	13
Intracellular Fluid.....	13
Ion Exchanges Between the Body and the External Environment .....	13
Body Fluid Compartments: Methods of Measurement.....	14
Measurement of Plasma Volume, Red Cell Volume and Blood Volume.....	16
Extracellular Fluid Volume .....	17
Interstitial Fluid Volume .....	17
Total Body Water .....	17
Transcellular Fluid Volume.....	18
Problems .....	18
Further Reading .....	19

<b>2</b>	<b>Essential Anatomy of the Kidney</b> .....	21
	Introduction.....	21
	General Morphology and Cellular Organization .....	21
	The Nephron .....	22
	Glomerulus.....	24
	Proximal Tubules .....	25
	Loop of Henle and Distal Tubule.....	25
	Collecting Duct .....	27
	Blood Supply and Vascular Structure Within the Kidney.....	27
	Function of the Renal Blood Supply.....	28
	Renal Lymphatic Drainage .....	29
	Juxtaglomerular Apparatus .....	29
	Erythropoietin .....	30
	Bladder and Micturition.....	30
<b>3</b>	<b>Glomerular Filtration</b> .....	33
	The Filter.....	33
	Functions of the Components of the Glomerular Filter.....	34
	Mesangial Cells.....	37
	Glomerular Filtration Process .....	37
	Glomerular Capillary Permeability.....	41
	Composition of the Glomerular Filtrate.....	41
	Filtration Fraction .....	42
	Glomerular Filtration Pressure as a Force for Tubular Flow .....	42
	Tubulo-Glomerular Feedback .....	42
	Problems .....	43
	Further Reading .....	44
<b>4</b>	<b>Tubular Transport</b> .....	45
	Introduction.....	45
	Primary and Secondary Active Transport .....	46
	Ion Channels, Uniporters and Facilitated Diffusion .....	48
	Paracellular Movement .....	49
	Water Absorption .....	49
	Fractional Excretion and Fractional Reabsorption .....	50
	Further Reading .....	50
<b>5</b>	<b>The Proximal Tubule</b> .....	51
	Morphology of Proximal Tubule Cells .....	51
	Proximal Tubular Handling of Sodium.....	51
	Sodium Entry .....	52
	Sodium Extrusion.....	52
	Chloride Reabsorption .....	52
	Water Reabsorption.....	54

Uptake of NaCl and Water into Peritubular Capillaries.....	54
Relationship of Proximal Tubular Reabsorption to Glomerular Filtration Rate .....	55
Proximal Tubular Reabsorption of Other Solutes.....	56
Glucose .....	56
Relationship of Glucose Reabsorption to Sodium Reabsorption.....	58
Amino Acids .....	59
Phosphate .....	60
Urea.....	60
Bicarbonate .....	61
Sulphate .....	62
Potassium .....	63
Albumin .....	63
Secretory Processes in the Proximal Tubule.....	64
Hydrogen Secretion .....	65
Problem .....	65
Further Reading .....	66
<b>6 The Loop of Henle, Distal Tubule and Collecting Duct.....</b>	<b>67</b>
Introduction.....	67
The Loop of Henle.....	67
Counter Current Multiplication Mechanism.....	67
Collecting Tubules/Ducts.....	73
Importance of Urea in Counter Current Multiplication .....	73
Further Requirements of the Counter Current Multiplication Mechanism: The Vasa Recta .....	75
Long and Short Loops of Henle.....	76
Regulation of Urine Concentration.....	76
Maximal ADH: The Production of Concentrated Urine.....	77
No Circulating ADH: The Production of Dilute Urine.....	77
Other Hormones Affecting Distal Nephron Transport Processes .....	78
Further Reading .....	81
<b>7 Renal Blood Flow and Glomerular Filtration Rate.....</b>	<b>83</b>
Measurement of Renal Blood Flow and Glomerular Filtration Rate.....	83
Inulin Clearance: The Measurement of Glomerular Filtration Rate .....	84
Clearance Ratios .....	86
PAH Clearance: Measurement of Renal Plasma Flow.....	86
Filtration Fraction .....	87
Regulation of Renal Blood Flow and Glomerular Filtration Rate.....	88
Problem .....	92
Further Reading .....	92

<b>8 Regulation of Body Fluid Osmolality</b> .....	93
Introduction.....	93
Osmoreceptors .....	94
Sensitivity of the Osmoreceptors to Osmotic Changes Caused by Different Solutes .....	94
Synthesis and Storage of ADH .....	95
Structure of ADH .....	97
Cellular Actions of ADH on Water Permeability.....	97
Removal of ADH from the Blood.....	99
Drugs Affecting ADH Release.....	99
Regulation of Water Excretion and Water Reabsorption .....	99
Effect of Solute Output on Urine Volume.....	101
Adrenal Steroids and the Renal Response to ADH.....	102
Further Reading .....	103
<b>9 Regulation of Body Fluid Volume</b> .....	105
Introduction.....	105
Effective Circulating Volume.....	105
Aldosterone .....	106
Control of Aldosterone Release .....	107
Renin and Angiotensin, and Their Relationship to Aldosterone.....	108
Actions of Angiotensin II.....	109
Starling Forces and Proximal Tubular Sodium Reabsorption.....	111
Renal Nerves .....	112
Prostaglandins and Other Arachidonate Metabolites.....	113
Atrial Natriuretic Peptide and Urodilatin.....	114
Other Factors Which May Be Involved in Regulating Sodium Excretion .....	115
Dopamine.....	115
Kinins.....	115
Nitric Oxide .....	116
Adrenomedullin .....	116
Endothelin.....	116
Natriuretic Hormone .....	116
ADH and the Relationship Between Osmotic Regulation and Volume Regulation.....	117
Overall Scheme of Body Fluid Volume Regulation.....	118
Further Reading .....	119
<b>10 Renal Regulation of Body Fluid pH</b> .....	121
Introduction.....	121
Physiological Buffers.....	121
pK Values and Equilibrium Constants .....	122

Renal Regulation of Plasma Bicarbonate Concentration.....	124
Conversion of Alkaline Phosphate to Acid Phosphate.....	127
Ammonia Secretion .....	128
Summary .....	130
Regulation of H <sup>+</sup> Secretion According to Acid–Base Balance	
Requirements .....	131
Compensation Versus Correction in Acid–Base Disturbances .....	131
Respiratory Acidosis .....	133
Respiratory Alkalosis .....	134
Metabolic Acidosis.....	136
Metabolic Alkalosis .....	138
Problem .....	139
Further Reading .....	140
<b>11 Renal Control of Body Fluid Potassium Content.....</b>	<b>141</b>
Importance of K <sup>+</sup> in the Body .....	141
Regulation of Body K .....	142
Renal K Handling .....	142
Aldosterone.....	143
Hypokalaemia .....	144
Renal Function in Hypokalaemia.....	145
Hyperkalaemia.....	146
Further Reading .....	147
<b>12 Renal Regulation of Body Calcium, Magnesium</b>	
<b>    and Phosphate .....</b>	<b>149</b>
Introduction.....	149
Calcium .....	149
Maintenance of Calcium Balance .....	150
Calcium Handling by the Kidney .....	151
Phosphate .....	152
Maintenance of Phosphate Balance .....	153
Calcium and Phosphate Homeostasis .....	153
Disturbances of Calcium and Phosphate Homeostasis .....	155
Magnesium.....	156
Magnesium Homeostasis .....	157
Renal Reabsorption of Magnesium.....	157
Regulation of Magnesium Balance.....	158
Disorders of Magnesium Balance .....	159
Further Reading .....	159
<b>13 Summary of the Principal Reabsorptive and Secretory</b>	
<b>    Processes in the Nephron Segments .....</b>	<b>161</b>
Introduction.....	161
Sodium.....	161
Water .....	161

Potassium .....	163
Hydrogen Ions and Bicarbonate.....	163
Phosphate .....	163
Calcium .....	163
Glucose .....	164
Urea, Ammonia and Other Nitrogenous Waste Products.....	164
<b>14 Disease Conditions Which Alter Renal Sodium and Water Reabsorption .....</b>	<b>167</b>
Introduction.....	167
Oedema .....	167
Congestive Heart Failure .....	169
Hypovolemia and Shock .....	170
Hypovolemic Shock.....	171
Cardiogenic Shock .....	171
Haemorrhage.....	172
Effect of Haemorrhage on Body Fluid Volume and Composition, and Renal Function.....	174
Additional Problems of Severe Haemorrhage (Hypovolemic Shock) .....	176
Measures to Prevent Irreversible Renal Damage.....	176
Hypertension.....	176
Secondary Hypertension .....	177
Renovascular Hypertension .....	177
Renal Hypertension.....	177
Primary Hyperaldosteronism .....	177
Essential (Primary) Hypertension.....	177
Treatment of Hypertension .....	179
ACE Inhibitors/Angiotensin Receptor Blockers.....	179
Calcium Channel Blockers .....	179
Diuretics.....	179
Malignant Hypertension.....	180
Liver Disease .....	180
Nephrotic Syndrome .....	183
Further Reading .....	183
<b>15 Use of Diuretics.....</b>	<b>185</b>
Introduction.....	185
Osmotic Diuretics .....	185
Loop Diuretics .....	186
Bartter's Syndrome .....	187
Thiazides .....	187
Gitelman's Syndrome.....	188
Aldosterone Antagonists .....	188
Na Channel Blockers .....	189

Contents	xv
Carbonic Anhydrase Inhibitors .....	189
Clinical Use of Diuretics .....	189
Acid–Base and Electrolyte Disturbances .....	190
Calcium Homeostasis and Diuretic Treatment .....	191
Azotaemia and Hyperuricaemia.....	191
Further Reading .....	191
<b>Answers to Problems</b> .....	193
<b>Index</b> .....	197
