

# Contents

|  |           |
|--|-----------|
| <b>List of Contributors</b>  | <b>ix</b> |
| <b>1. Key Drivers of Food Insecurity</b>   | <b>1</b>  |
| <i>Helen Fyles and Chandra Madramootoo</i>   |           |
| 1. Introduction  | 1         |
| 2. Food Prices   | 1         |
| 3. Rising Demand for Food  | 2         |
| 4. Climate Change  | 3         |
| 5. Availability of Natural Resources   | 8         |
| 6. Markets and Trade   | 11        |
| 7. Investments in the Agricultural Sector  | 11        |
| 8. Biofuel Production  | 12        |
| 9. Conclusions   | 14        |
| References   | 14        |
| <b>Part One Emerging Technologies for Plant and Animal Food Security</b>   | <b>21</b> |
| <b>2. Emerging Genetic Technologies for Improving the Security of Food Crops</b>                                       | <b>23</b> |
| <i>Jaswinder Singh, Simerjeet Kaur and Haritika Majithia</i>   |           |
| 1. Introduction  | 23        |
| 2. Success Stories: The Green Revolution   | 26        |
| 3. Current Scenario: The Gene-Sequencing Revolution  | 27        |
| 4. Molecular and Genomic-Assisted Breeding   | 30        |
| 5. Genomics-Integrated Breeding Technologies   | 32        |
| 6. Implementation of Integrated Breeding Strategies for Food Security  | 35        |
| References   | 36        |
| <b>3. Successful Technologies and Approaches Used to Develop and Manage Resistance against Crop Diseases and Pests</b> | <b>43</b> |
| <i>G.L. Hartman, M.L. Pawlowski, H.-X. Chang and C.B. Hill</i>   |           |
| 1. Introduction  | 43        |
| 2. Current Approaches to Increase Resistance Durability  | 47        |
| 3. Improvement of Crop Resistance with Genetic Transformation  | 51        |

|  |            |
|--|------------|
| 4. Inducing Plant Defenses   | 54         |
| 5. Future Considerations   | 58         |
| References   | 59         |
| <b>4. The Use of Technologies for Sufficient and Quality Animal-Food Production</b>            | <b>67</b>  |
| <i>Kevin M. Wade</i>   |            |
| 1. Introduction  | 67         |
| 2. The Need for Animal Products  | 67         |
| 3. Improved Animal Production Through Technology   | 73         |
| 4. The Challenges Associated with Using Improved Technologies                                  | 81         |
| 5. Future Trends   | 87         |
| References   | 88         |
| <b>5. Aquaculture Technologies for Food Security</b>   | <b>93</b>  |
| <i>David C. Little and Stuart W. Bunting</i>   |            |
| 1. Introduction  | 93         |
| 2. Aquaculture, Fisheries, and Related Forms of Food Production                                | 95         |
| 3. Key Change Drivers  | 98         |
| 4. Intensification: Options and Implications   | 99         |
| 5. Life Stage and Technological Choices: Many Opportunities for Juveniles, Fewer for Food Fish | 102        |
| 6. Risk Management and Biosecurity for Animal and Environmental Health                         | 103        |
| 7. Species or Strain Opportunities for Genetic Gain  | 105        |
| 8. Toward Specialization or Integration: Aquaculture at a Crossroads                           | 107        |
| 9. Future Trends   | 109        |
| References   | 110        |
| <b>Part Two Environmental and Policy Issues Affecting Food Security</b>                        | <b>115</b> |
| <b>6. Water Management</b>   | <b>117</b> |
| <i>Helen Fyles and Chandra Madramootoo</i>   |            |
| 1. Introduction  | 117        |
| 2. Practices to Raise Water Use Efficiency (WUE)   | 119        |
| 3. Wastewater Use  | 124        |
| 4. Excess Water Management   | 125        |
| 5. Environmental Issues  | 126        |
| 6. Institutions and Governance   | 127        |
| 7. Conclusions   | 130        |
| References   | 130        |

|  |            |
|--|------------|
| <b>7. Reducing Postharvest Losses</b>                        | <b>135</b> |
| <i>Marie-Josée Dumont, Valérie Orsat and Vijaya Raghavan</i> |            |
| 1. Introduction  | 135        |
| 2. Handling of Fresh Fruits and Vegetables                   | 135        |
| 3. Storage of Fresh Fruits and Vegetables                    | 138        |
| 4. Handling and Storage of Grains and Cereals                | 141        |
| 5. Quantitative and Qualitative Losses                       | 146        |
| 6. Packaging and Distribution Chain                          | 149        |
| 7. Conclusions   | 153        |
| References   | 153        |
